

# Scaffold Inspection Tag

The MAXSafe® Scaffold Tag eliminates the limitations of the traditional scaffold tag, by not having to be hung on the scaffold tube. This means that the MAXSafe® Scaffold Tag does not need to be cut or modified to fit in the best place in every situation.

MAXSafe® Scaffold Inspection Tags don't need to be removed or altered throughout the scaffolding process and also has the outstanding feature of being able to extend the certification stage by simply adding an insert tag. Up to 10 inserts can be added per tag.

MAXSafe® Scaffold Tags are the best single package solution in almost every situation for ensuring safety for

all users of the scaffold. Designed for use on all work sites, always providing the highest level of safety and compliance.
